Unicom present the last test bench, a simulator of rain for motorcycles

It's realization for Ducati Motor spa realized during april 2010.

It's a endurance testing bench that simulate the situation of rain in order to test completely electric lighting set .

It's possible to vary pressure and direction of water in automatic cycle during the test.

The bench is managed by PLC Siemens and program is derivated from famous  Unicom Easy Soft ® developed from Unicom engineer .

For more information please visit this Endurance testing bench on <http://www.youtube.com/watch?v=U00Cm0m1p0g>
